

Vaccination against Coronavirus according to Quantum Biophysical Semeiotics

by Sergio Stagnaro

Orthodox, traditional, academic West medicine mistakenly considers the human body just Energy-Matter, in oblivion of the triadic classification of Energy (Information Energy, Matter Energy and Vibratory Energy), according to Paolo Manzelli.

In reality, Energy-Matter represents only a part of our body, while Energy-Information and Vibratory Energy (ATP) make up the remaining billion.

In this regard, I recall the Marina Experiment, which clinically demonstrates the above referred from a biological point of view (http://www.sisbq.org/uploads/5/6/8/7/5687930/wefbif_2014.pdf).

It follows that, according to traditional medicine, which has proved incapable of stopping the epidemics of CVD, T2DM, degenerative cerebropathies, osteoporosis, rheumopathies and cancer, the definition of vaccination is necessarily "the administration of a vaccine both for prophylactic purposes (vaccinoprophylaxis) and for the therapeutic purpose (vaccinotherapy)", in accordance with the dogma "Corpora non agunt nisi conjuncta", in the oblivion of the Non-Local Reality, demonstrated by me in biological systems (1).

According to Quantum Biophysics Semeiotics, there are two sides of the diagnostic-therapeutic medal: one considers the potential, preclinical disease, terrain of Pre-Primary and Primary Prevention and the other, politically and economically correct, the only known to Orthodox Medicine, kingdom of screening, which studies the disease now underway, however initial it may be. Vaccination, according to Quantum Medicine, cannot fall within the domain of Academic Medicine.

To understand the following, the Reader must know both the Non-Local Reality present in biological systems and tissues (Beta Lymphocytes) and the Psychokinetic Diagnostics, which made vaccination against Covid-19 possible, according to Quantum Biophysics Semeiotics, and its therapeutic monitoring (2-12).

The purpose of a vaccination is to protect the vaccinated against a defined disease, in our case caused by Covid-19, by stimulating the synthesis of Ig-G in the vaccinated, as occurs in the patient who has passed the infection.

Vaccination against Coronavirus, according to Quantum Biophysics Semeiotics, is made possible by the progress made by Medicine in the last 65 years, unfortunately not known in countries, such as Italy, where Medicine is servant of the economy.

The following describes the clinical method to carry out vaccination against an infectious disease, the coronavirus, which, until 23 April 2020, caused the death of 25,000 Italians on a large scale.

With the Russian Ak-tom device (= Cem-tech), using program 2 (FIR-Mode), lasting one minute (60 seconds), the Doctor takes the electromagnetic radiation emitted by the liver, including the local B lymphocytes, entangled with all the others in the different locations, of a known subject, recovered from the simple infection by coronavirus or from the full-blown disease, to which the vaccinator thinks intensely during the maneuver, after having appropriately positioned the two diodes: one above the skin projection of the his left lobe and the other above that of the right lobe of the liver.

For the Non-Duality existing in biological systems, using the entanglement phenomenon at the basis of Psychokinetic Diagnostics (1-12), the Doctor collects in the two diodes the information necessary to carry out quantum vaccination.

After the minute of taking the information - derived from the oscillations of the Ig-G against the coronavirus - the Doctor loads an Assirya card by simply connecting appropriate wires and using the Ak-tom.

I proceeded to load the frequencies of the various components of the liver of a friend who overcame the infection from SARS-Cov-2 in a Big-Mother Assirya Card, which emits Energy-Information at infinite distance, according to my dated research conducted at the invitation of the producers, evaluating the benefits obtained in 30 healthy people, Man 14, Female 16, aged between 10 and 80 years, many miles away from me. The increase in the synthesis of Ig-G was significant.

Basically I evaluated the Hepato-Gastric Aspecific Reflex between meals: Latency time = 8 sec. and Duration <3 sec. - 4 sec.> ($3s < D < 4s$),

Immediately after sending the card's E-M radiation to vaccinates, the TL doubled, rising to 16 sec., With a duration of 4-5 sec.

The Spattini Sign (13) (crucial for the diagnosis of positive covid-19), sought after in the pharynx and skeletal muscle was absent in the base, but present after vaccination: TL 7-8 sec. and Duration 4-7 sec.

The data of Clinical Microangiology are extremely interesting (14).

Basically and between meals, fluctuations in the peripheral hepatic heart showed an intensity of no more than 1.5 cm. and duration of the diastole of 7 sec.

After vaccination, the intensity exceeded 2 cm. and the duration rose to 8 sec., as in subjects who have overcome the infection with Coronavirus.

Obviously the serological tests, performed before and after the vaccination, corroborate the results of my research.

Having a Big-Mother Assirya Card, suitably loaded as indicated above, has favorable social implications. Placing a couple of these cards at the entrance of a factory, offices, schools, places where people gather (for example, Churches) would effectively contribute to the fight against coronavirus by requiring a limited expense.

Note!

I declare that there is no conflict of interest. My clinical research was conducted - as always - for the sake of medicine without any personal economic benefit. Ak-Tom (Cem-Tech) producers & sellers ignore this article before it is published.
