

**Breast - Gastric Aspecific Reflex (Br. G. A. R.) mean - intense digital pressure on breast (breast trigger points)**

Latency time (Lt) in seconds	Latency time after preconditioning (pause of 5 sec.)	MFR in seconds	fD & equilibria	EBD	Preconditioning	Dachà's Sign	Diagnosis
Lt = 9.5 in women [Lt= 12.5 In men]*	Lt ≥ 19 [Lt = 16 if intense digital pressure on cutaneous projection of epiphysis – <b>negative Rinaldi's Sign</b> – absence of OT]	3 < MFR < 4 normal MFR, associated activation, outcome +	fD ≥ 3 (ideal value fD=3.81) stange attractor	Normal EBD physiological function	Type I Physiological tissue microvascular unit	<b>Absent</b>	Health
Lt < 9.5	Lt < 19 [Lt = 0 if intense digital pressure on cutaneous projection of epiphysis – <b>positive Rinaldi's Sign</b> –OT]	MFR = 4 compromised MFR, dissociated activation, outcome ±	2 < fD < 3 limit cycle	Normal, slightly modified EBD function, small number of pathological EBD	Type II A Intermediate tissue microvascular unit	<b>After 3 sec. tonic Gastric Contraction - tGC</b> - local autoimmune syndrome - accompanied by gallbladder - and splenic contraction – decongestion: positive Dachà's Sign	Breast Cancer Inherited Real Risk
Lt < 8	Lt < 16 [Lt = 0 if intense digital pressure on cutaneous projection of epiphysis – <b>positive Rinaldi's Sign</b> –OT]	4 < MFR ≤ 5 growing compromised MFR, dissociated activation, outcome ±	1 < fD ≤ 2 limit cycle	Modified EBD function, increasing number of pathological EBD	Type II B Intermediate tissue microvascular unit	<b>After 3 sec. tonic Gastric Contraction - tGC</b> - local autoimmune syndrome - accompanied by gallbladder - and splenic contraction – decongestion: positive Dachà's Sign	Breast Cancer Inherited Real Risk in evolution
Lt ≤ 4	Lt < 8 [Lt = 0 if intense digital pressure on cutaneous projection of epiphysis – <b>positive Rinaldi's Sign</b> –OT]	MFR > 5 absent MFR, dissociated activation, outcome – (MFR ≈ 8 angina pectoris)	fD = 1 fix point	Normal EBD function pathological, large number of pathological EBD	Type III Pathological tissue microvascular unit	<b>After 3 sec. tonic Gastric Contraction - tGC</b> - local autoimmune syndrome - accompanied by gallbladder - and splenic contraction – decongestion: positive Dachà's Sign	Overt Breast Cancer

Table 1. Legend: MFR (Microcirculatory Functional Reserve); EBD (Endoarteriolar Blocking Device); CAD (Coronary Artery Disease); fD (fractal Dimension); Lt (Latency time)

\* In men all values all proportional to the Lt of 12.5 seconds in physiological state
